

Community-Driven Approaches to Crime Reduction - District Strategic Plan

CHICAGO POLICE DEPARTMENT

District: 001

Year: 2025

SECTION 1 – PROBLEM SOLVING PRIORITIES

Determine and define three problem solving priorities for your District for the coming year, as identified by the community. Provide responses below to delineate how the District will apply the SARA model of problem solving to each priority. **Please ensure responses are specific and detailed.**

PROBLEM SOLVING PRIORITY #1

Scanning	Priority Title	Vice Complaints (Beats 111, 113, 122, 123, 131)			
	Priority Type	<input type="checkbox"/> Violent Crime	<input type="checkbox"/> Property Crime	<input checked="" type="checkbox"/> Quality of Life	
	Source <i>Check all that apply</i>	<input checked="" type="checkbox"/> Calls for Service	<input checked="" type="checkbox"/> Community Conversations	<input checked="" type="checkbox"/> DAC Meetings	<input type="checkbox"/> Resident Survey Data
		<input type="checkbox"/> Crime Data	<input checked="" type="checkbox"/> Community Interactions	<input checked="" type="checkbox"/> Beat Meetings	<input checked="" type="checkbox"/> Other: Zencity
Analysis	Rationale <i>Explain why this is a top priority for your district. Provide specific numbers for calls for service and/or crime data to support your explanation. Be as specific as possible.</i>	Vice complaints was one of the most discussed issues at our community conversations, beat meetings, and District Advisory Committee meetings. Zencity participants also posted comments related to this being a concern for them. Not only did community members discuss the problem of people openly drinking and using drugs in public, but the secondary issues this problem causes. They related that many of the people doing these activities, also harass those around them, litter in the area, and generally make the area feel unsafe.			
		This priority problem is for beats 111, 113, 122, 123, and 131. The 1st District received 231 total vice related calls between January 1st and November 21st 2024. This is a 15 percent increase over the same period in 2023. There are 11 total beats in the 1st District, however these 5 beats comprised 171 out of the 231 vice complaints (the other 6 beats had 60 calls.)			
		1. Who is / are the victim(s)? Residents, businesses, students and tourists to the area.			
		2. Describe the methods / actions used by the offender (do not include demographic information). Include any identified patterns such as motives, types of weapons used to commit the crime, how they attempt to flee the scene of the crime, etc. The offenders in the vice complaints will often gather in large groups. This adds to the intimidation factor of the problem. Often times this occurs outside of stores, near train stations or in public places, such as parks.

Analysis	Rationale <i>Explain why this is a top priority for your district. Provide specific numbers for calls for service and/or crime data to support your explanation. Be as specific as possible.</i>	<p>This is a top priority because during our recent community meetings, many people brought up robbery, as their biggest concern. This was the case due to the risk of violence, the psychological impacts of the crime and also the economic consequences. The 1st District has seen a 25 percent increase in 10 sector robberies this year compared to last.</p> <p>Between January 1st and November 21st of this year, there were 186 robberies in the 10 sector. This is an increase of 38 robberies over the same time frame last year. By making this a priority, we can ensure more resources are dedicated to reversing this trend.</p>			
	Problem Analysis <i>Explain the problem by describing each of the listed elements. Be as specific as possible.</i>	<p>4. Who is / are the victim(s)?</p> <p>The victims are unsuspecting commuters, students, residents and local businesses.</p>			
		<p>5. Describe the methods / actions used by the offender (do not include demographic information). Include any identified patterns such as motives, types of weapons used to commit the crime, how they attempt to flee the scene of the crime, etc.</p> <p>The offenders often approach quickly by vehicle, or sometimes bicycle, and leave the area just as quickly. This makes apprehension difficult. Many of the offenders will wear a mask. If the offenders approach on foot, they will often use one of the many public transportation systems to exit the area quickly.</p>

Response		6. What is the location of this criminal activity? Use street names to delineate the boundaries below: <ul style="list-style-type: none"> • Eastern Boundary: Lake Michigan • Western Boundary: Clark St • Northern Boundary: Wacker Drive • Southern Boundary: Ida B. Wells/Roosevelt 		
	Root Cause Analysis Identify potential root causes of the problem that, if mitigated, would prevent the problem from re-occurring. Be as specific as possible.	The root cause of these robberies is that offenders take advantage of the fact the 1st District is a resource rich area and also the fact that there are numerous transportation modes surrounding the area.		
	Response Strategy Describe the overall approach that will be taken to solve the problem, based on the Analysis completed above. Non-enforcement strategies must be included.	Non-enforcement response (required): Officers will work with community members and businesses to provide them with best practices to avoid becoming a victim. We will increase the number of Walk and Talks as well as Outdoor Roll Calls in the area. This includes the areas around our public transportation systems, which are often used to flee the area. We will encourage community members to form or increase participation in block clubs and other neighborhood organizations. Officers will attend events organized by these groups whenever possible. Finally, we will work with the Alderman's office to make sure the area is clean and has proper lighting.		
	Root Cause Mitigation Explain how the Response Strategy directly addresses the root cause that was analyzed above.	Enforcement response (if applicable): Officers will increase the number of robbery missions conducted in this area. This will allow Officers to respond to suspicious activity or be close by to apprehend offenders. The SDSC room will routinely scan the area. When a robbery is reported they will track suspects and relate this information to field Officers. Often times numerous robberies are conducted by the same person(s.) Making arrests will go a long way in deterring future robberies.

Be as specific as possible.</i>	<p>Motor vehicle theft causes great hardships. These include economic loss, emotional and psychological impact, logistical concerns, increased law enforcement resources and secondary crimes committed with the stolen vehicles.</p> <p>The total number of motor vehicle thefts on Beat 123 far exceeds that of other beats in the District. During the timeframe between January 1st 2024 and November 21st 2024, Beat 123 saw 188 total motor vehicle thefts.</p>			
Analysis		<p>7. Who is / are the victim(s)?</p> <p>Residents, food delivery drivers, and visitors to the area.</p>			
	Problem Analysis <i>Explain the problem by describing each of the listed elements. Be as specific as possible.</i>	<p>8. Describe the methods / actions used by the offender (do not include demographic information). Include any identified patterns such as motives, types of weapons used to commit the crime, how they attempt to flee the scene of the crime, etc.</p> <p>Thefts from parking garages is the number one way vehicles are being stolen. Offenders will enter the garages unnoticed and steal one or more vehicles before even being noticed. Many of these garages are open to the public and unsecured.</p> <p>Many vehicles are also taken from the street. Offenders will either check to see if the vehicle is unlocked, or break a window to gain access. Specific vehicles are often targeted for either being easier to steal or being of higher value. 	Root Cause Analysis <i>Identify potential root causes of the problem that, if mitigated, would prevent the problem from re-occurring. Be as specific as possible.</i>	<p>Creating more barriers for offenders to overcome when attempting to steal a vehicle would greatly reduce the total number of thefts. The parking garages that have the most security see the least amount of thefts. For those that need to park on the street, anti-theft devices can also help. Finally, making sure people do not leave vehicles running unattended.</p>		
	Response Strategy <i>Describe the overall approach that will be taken to solve the problem, based on the Analysis completed above. This can include more lighting, security personnel, barriers, and cameras. Vehicle safety tips will be discussed at community meetings as well as passed out to residents/visitors in the area. When security devices are available, they will be given to residents in areas most affected by motor vehicle theft.</p>		
		<p><i>Enforcement response (if applicable):</i></p> <p>The district will conduct motor vehicle theft missions on a daily basis.
