The year 1972 was a year of progress for the Chicago Police Department. The effects of the Chicago Police Department's continuing efforts to serve and protect the citizens of Chicago are presented in this Statistical Summary.

CRIME RATE

1972 is marked as the third consecutive year during which there was a crime decrease in Chicago; since 1969 there has been a 5.9% reduction in serious crime. The total decrease in index (serious) crime during 1972 was 3.3% as compared to 1971. Among the fifty-six cities in the United States with populations of 250,000 or more, Chicago ranked forty-ninth in serious crime rate per capita in 1972, forty-fifth in 1971, and forty-third in 1970.

In contrast to the decrease in the number of serious crimes, the number of arrests for serious offenses increased 4% in 1972 as compared to 1971. The number of robberies on the City's Mass Transit lines decreased 27% as a result of the deployment of personnel assigned to the Special Operations Group, Mass Transit Unit. The unit continued to increase the number of arrests made on Chicago Transit Authority trains, stations, and platforms. In addition to the uniformed members which comprise the unit, undercover decoy tactics were employed to effect the arrest of would-be robbers.

In 1972, over 10,000 arrests were made for narcotics violations. Intensified efforts are being made to further reduce drug traffic by concentrating enforcement activities against organized crime activities which are responsible for quantity distribution of narcotics to lower echelon traffickers and ultimate users.

The decrease in crime may be attributed to the Department's deployment of conspicuous, aggressive patrol and the rapid response time of patrol units to radio assignments. The number of public calls for service and the Department's emergency dispatch responses through the Communication Operations Section reached a total of 2,218,914 calls through the end of 1972 in comparison to 2,169,437 calls recorded in 1971. 74% of all calls for service were acknowledged within 12 seconds of the original call for service from a citizen.

TRAFFIC SAFETY

In 1972, Chicago retained its reputation as the safest of the six major cities (population over one million), with the lowest number of traffic accident fatalities per 10,000 registered vehicles. Chicago's traffic accident death rate per 10,000 registered vehicles increased only 0.1% despite an increase in the number of vehicles registered.

PROGRAMS

In 1972, an Auto Theft Prevention Program was instituted in cooperation with Chicago Public and Parochial schools. This program is designed to inform youths of the possible lifelong impairment of their future if apprehended while driving or riding in a stolen vehicle. This program contributed significantly to the 8.3% decrease in auto theft during 1972.

A fully automated color photographic laboratory, installed in the latter part of 1972, now permits the Department to process color photographs of criminal suspects, crime scenes and related subject matter at a substantial cost savings.

Transfer from the City's Data Center of a major portion of the Police Department's computer operation has resulted in centralized and improved services to field forces of the Department at reduced cost.

A unique test program has been instituted in the 18th Police District to facilitate the bonding of prisoners by using "Picture-phones" for a prompt hearing. This program allows the judge to observe the arrestee while conducting the bond hearing. If this program is effective, the Department will fully implement this system in all districts and the Bond Court.

The quality of life is a constant concern of the Department. In 1973, the Motor Maintenance Division installed new testing equipment to ensure compliance with noise abatement and environmental pollution standards. Inspection of the Department's fleet subsequently revealed that the vehicles fall far below the standards of permissible pollution emission and noise levels. The Department is acknowledged as a nationwide leader in the field of environmental control in fleet operations.

During 1972, a pilot program was established by the Business Crimes Prevention Section. Officers assigned to this section conducted a series of surveys of commercial establishments and made security recommendations. Subsequent inspections revealed an 81.8% compliance with the suggestions that had been offered. The section continued its seminars on the identification and reduction of crime directed against business and industry. These seminars, held in conjunction with members of the Criminal Investigation Division, alerted selected audiences to the potential crimes to which business and industry can be subjected.

The Community Service Aides Project, initiated prior to 1972, continued to operate with great success. Community Service Aides working in Model Cities target areas, performed a variety of tasks designed to reduce the incidence of crime in the target areas, and improve police-community relations, quality of life, and allow the police patrol force in the neighborhood to spend more time on crime prevention. The most significant programs were the Sickle Cell Anemia and Lead Testing Programs.

A program has been established to make effective use of Spanish-speaking members of the Department in police related capacities, utilizing their talents to improve communications and understanding between police personnel and the Spanish-speaking citizens of Chicago.

"Officers Friendly" visited over half a million grammar school children during 1972. This program, one of many administered by the Neighborhood Relations Division, affords children the opportunity to meet a police officer first hand. Children are acquainted with the role of the police in the community and are instructed that he is a friend willing and able to give help.

PERSONNEL

A Civil Service List posted in the early part of 1972 contains more than 3,000 eligible candidates for patrolmen, indicative that police work has become a more attractive career choice for an increasing number of young people.

There were 213 Civil Service promotions in 1972, 16 men promoted to Captain, 47 promoted to lieutenant, and 130 to the rank of Sergeant.

During 1972, approximately 6,000 members participated in educational courses designed to upgrade not only police related skills but also improve community services through studies in various behavioral fields.
