OFFICE OF THE  
SUPERINTENDENT OF POLICE  
CHICAGO

HAROLD WASHINGTON  
Mayor

FRED RICE  
Superintendent

1 September 1986

Honorable Harold Washington  
Mayor of the City of Chicago  
Room 500, City Hall  
Chicago, Illinois 60602

Dear Mayor Washington:

Submitted herewith is the Chicago Police Department's annual Statistical Summary for 1985.

Highlighted in the overview of the Department are projects and programs that are designed to be of significant help to the citizens of Chicago, and enhance the quality of service by the members of the Department.

This Statistical Summary is produced for Department members as a reference, and for other governmental agencies at the city, county, state and national levels and others who may request information from the Chicago Police Department.

In our efforts to provide the citizens of Chicago with the finest Police Department in the nation, we are indebted to you, the City Council and other department heads for continued support.

Sincerely,

Superintendent of Police

# Department puts projects in place to aid citizens

Programs and projects were instituted by the Department during 1985 in a continuing service to the citizens of Chicago that concerned family violence, victim assistance, gang problems, missing children, computers, an auto theft videotape and a new district facility.

Utilizing the provisions of the recently passed Illinois Domestic Violence Act, the Department introduced a project that combines the efforts of the police, courts and private organizations in an innovative approach to a problem that stubbornly resists resolution—family violence.

Through cooperation of United Charities and the Department, the Family Options 3-year pilot program was set up in two districts, the 13th and 23rd.

Families experiencing domestic violence normally are without the resources they need to break the cycle of violence they are experiencing. Family Options offers the first opportunity in most of these cases to break the cycle. A full range of intervention services is made available.

The project is designed to help families overcome the cycle of violence they are experiencing by assisting them through the complex court process and by helping them to address the family problems that have contributed to the violence.

Victims who come to Family Options are provided with a complete social and legal assessment of their needs. Financial assistance, shelter, alcoholism and substance abuse counseling, family counseling and a legal assessment is provided.

Families are encouraged to call Family Options when problems recur, and the staff has found a significant number of calls coming in which would formerly have been placed to

Deputy Superintendent Ira Harris, Bureau of Community Services, is joined by Sergeant Doug Bolling, left, and Officer John Bell, as they go over Community Gang Control Program.

the emergency 911 number.

When the pilot project ends, researchers will conduct an evaluation to determine the extent of its impact upon the domestic violence experience of the two pilot districts.

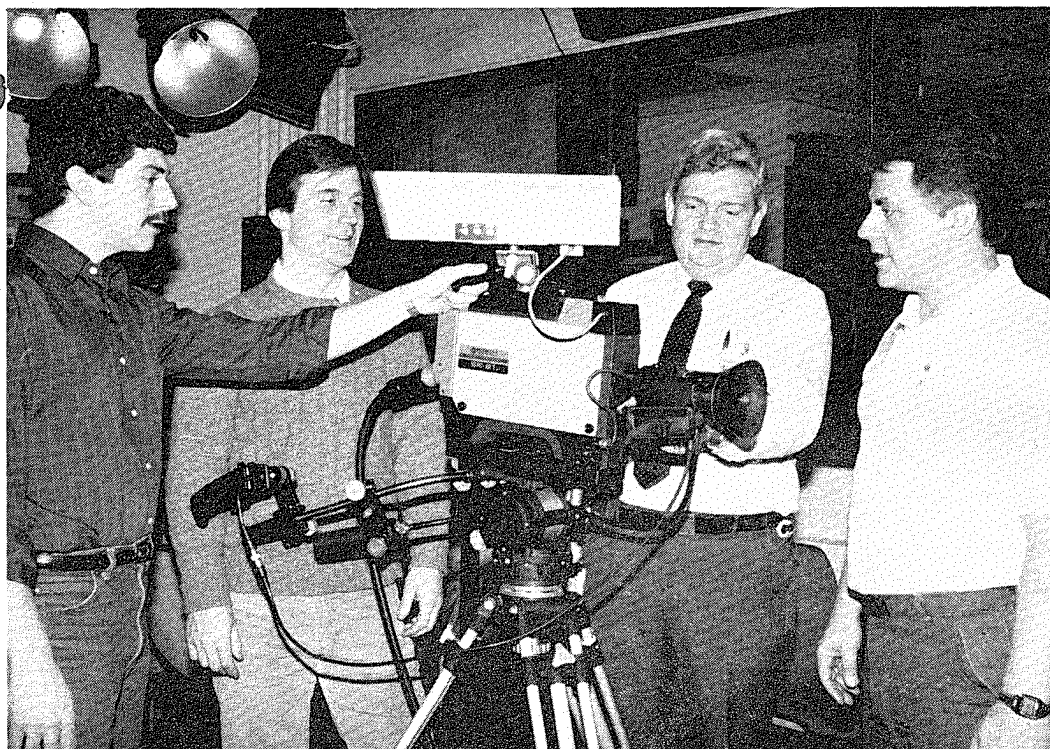

"We are looking forward to that evaluation document," said Superintendent Fred Rice. "If the data indicates that the project has had a significant impact upon levels of family violence, we will give strong consideration to implementing the program city-wide."

Another pilot project, the Victim Assistance Program, was initiated in the 6th District. It is geared to provide assistance to citizens and their families who have been victimized by the following offenses: murder, aggravated assault and battery, criminal sexual assault, robbery, residential burglary and threats and intimidation.

The program was developed in cooperation with the National Organization of Black Law Enforcement Executives (NOBLE). The program is formulated to demonstrate to the

Scenes from Auto Theft Section's videotape program alerts officers on auto theft and offers practical tips and information.

community that the Department cares. It also has been introduced in other major cities in the country.

It is anticipated that increased assistance to victims of crime will (1), make victims aware of available services and resources which respond to their immediate needs and reduce the trauma of victimization; (2), increase the willingness of victims to cooperate with police and courts; (3), enhance the sensitivity of Department members to the needs of victims of violent crimes, and (4), improve police-community relations.

To combat the city's increasing gang problems, the Department established the Community Gang Control Program. The first part of the program emphasizes enforcement through intensified arrests and vigorous prosecution of hard-core gang leaders. The second element deals with channeling potential gang members into positive activities prior to gang inducement.

Members of the Bureau of Community Services concern themselves with the second part of the program, which includes employment opportunities, education and training, recreational and cultural activities into which young people can be placed, assuming that they fit the program's criteria.

The Department-wide program begins at the district level with the Neighborhood Relations sergeant and Beat Representative coordinator assuming equal responsibility in implementing the program. They locate volunteer resources in the community to meet the needs of the program. Officers of the Neighborhood Relations Division assist them in finding these resources.

The major purpose of the program is to identify the marginal gang members. These include youths who change schools because of gang harassment; youths who are intimidated into joining gangs and youths who have been solicited by gang leaders, but continue to decline the invitation.

The program seeks to take these youths away from the

gang environment and to give them positive alternatives. The youths are referred to the Department by school principals, teachers, Park District supervisors, organizations, clergy members, building managers and parents.

It is an outreach effort for jobs, training and further development of academic and vocational skills. The program represents a trend in law enforcement in general and the Department's continuing role to become increasingly involved with the community as an integral force and hub of activity.

The program has been successful. It has channeled youths into sports, counseling, helping them improve their lives, their skills and recommending them for jobs.

Another successful program has been the one on missing children. It all started with the Youth Division placing "We

Care" posters in police facilities and other government and public buildings.

With the early rewards of returned missing children, Superintendent Rice made the program a priority and announced a massive public service venture of placing pictures of missing children on milk cartons. The children are placed on

the cartons for a month, unless returned before then, and replaced by others.

Ever since the Department announced that it had joined in the public service venture on missing children, the Youth Division has received requests for information nationally and world-wide. More than 60 organizations contacted the division including radio-television outlets, newspapers and governmental agencies. They offered to help disseminate information about the program in the event that any of the missings were in their area.

During the year a new tool for fighting crime was implemented by the Department—the Rapid Access Management Information System, or as it also is known by the acronym—RAMIS. Seven departments of the City are using the system through its Data Center computer.

The system began in the Finance Division, then was picked up by the Detective Division.

Before RAMIS was set up, the Finance Division didn't have instant answers for inquiries it was receiving concerning seniority and salary problems. It required a lot of time going manually through files and reports to unearth the information that was needed. Now, it is at their fingertips. It's all done in simple language and the answers appear on the computer screen.

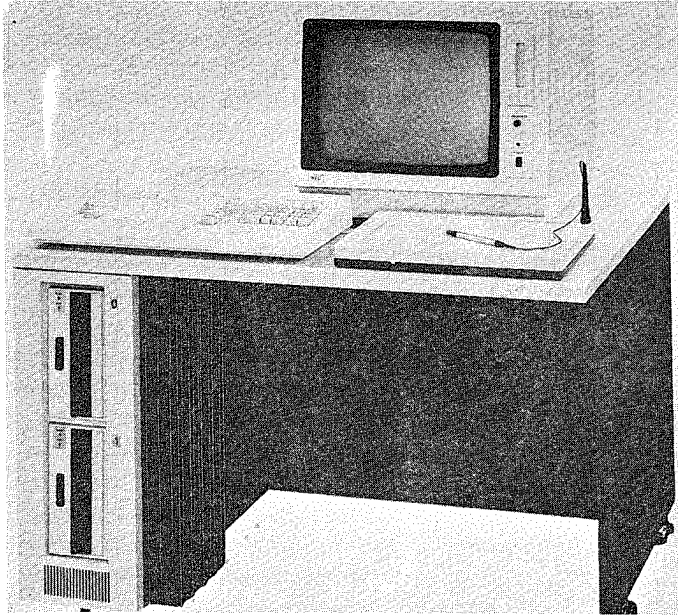

The Detective Division learned the exciting possibilities of RAMIS and started to automate reports into CRIMES, an acronym for Case Report Information Management Evaluation System. All case reports, except traffic accident reports were put into the system. It contains all the data on the reports except the narratives and witness information. There are more than 650,000 case reports logged into the system.

It has proved to be a great tactical investigative tool. You can learn how many types of unsolved and solved cases there are instantaneously through the data base. For example, you could learn how many crimes have been committed in an area covered by a particular beat in two minutes.

Continued on following page

Beat Representative Division personnel, in addition to Neighborhood Watch Program, also are involved in Community Gang Control Program and Victim-Witness project.

Fingerprint experts of the Department will have a new tool starting in 1986-87—an Automated Fingerprint Identification System. The AFIS system will initially have a data base of 625,000 fingerprints with a capacity of 900,000. It will give tenprint identification in seven minutes, and can search 1,500 fingerprints per second. Fingerprint monitor shown will be used by Department experts. Goal of AFIS is to positively identify persons in custody in shortest time and to identify latent fingerprints from crime scenes.

The Federal Bureau of Investigation and the Central Intelligence Agency have used RAMIS, but the Department is the first municipal law agency in the country to use RAMIS for tactical police operations.

An officer's mind can absorb only so much information while the computer can remember and decipher all of the data. It can be effective in revealing a crime condition in a beat or area and help in the development of a crime pattern. The RAMIS capability not only helps the officer on duty, but to the one returning from a day off or furlough, and be able to know what has transpired earlier. Reports that would have taken three weeks to gather now can be available in three minutes.

Officer Richard Fera, an Officer Friendly, works with hearing-impaired children during visit with them in Chicago school.

Another innovation has been a new training videotape developed by the Auto Theft Section of the Detective Division for the Department through the cooperation of the Video Service Section of the Training Division. The National Automobile Theft Bureau also offered its assistance and served as technical consultant.

The primary thrust of the training video was to make the officer in the field aware of the important 17 characters involved in the Vehicle Identification Number (VIN).

The videotape, which runs approximately 35 minutes, gives officers the basics, a working knowledge and the facts that they may not be aware of on stolen autos. The license plate and vehicle registration doesn't always tell the officer if the vehicle is stolen. The VIN number, however, can reveal the true owner of the vehicle.

The VIN tells the officers on the street what to look for and provides a wealth of information about the vehicle. It tells the officer the name of the manufacturer, year, make, model and body style of the vehicle. Visually, the video reemphasizes what has been taught in the classroom.

The project started out as a program for the Department, but its application can be used nationwide because the VIN code is universal and can be used by any law enforcement group.

Currently used in recruit training, the videotape also is in use by police jurisdictions in all 50 states, Canada and Puerto Rico.

A modern police facility for the 14th District (Shakespeare) was dedicated in the spring. The building situated at 2150 North California Avenue, replaced a structure that was built in 1908. The station is the second one to be built in Police Area 5. The other is the 25th District, which is housed in the Area 5 Center at 5555 West Grand Avenue. The original Shakespeare Station was demolished for additional parking space.

The two-story station has 40,000 square feet of space. It has accommodation for the district staff personnel, a curved Sergeant's Desk of polished granite, waiting room, an assembly hall, detention area with 20 cells, locker rooms for male and female officers, a roll call room, gym and canteen. It was erected at a cost of approximately \$6,500,000.

# TYPES OF DATA PRESENTED

The tabulations and graphs which follow give data on crimes reported, on arrest and other results of police information.

The basis of reporting the data is the 12-month calendar year.

12 - MONTH YEAR ( 1 January through 31 December 1985 ).

The 12 - Month calendar year ( 365 days ) is used where the date relates to the Federal Bureau of Investigation, Illinois Uniform Crime Reporting, City of Chicago and certain other reports.
